

# NO-SEW FLEECE CAT BEDS

## Materials Needed:

Fabric Scissors

Yard Stick

2 Pieces of fleece fabric, 25" x 20" inches (can be the same pattern or you can mix and match)

1 piece of quilt batting (batting that can be unrolled), 19" x 14" inches

3 x 3 inch cardboard square

## Directions

- ❧ Match the two pieces of fleece together (wrong sides touching and right side facing out) and cut a 3x3 inch square from each corner. Use the cardboard square as a guide.
- ❧ After you have cut out the corners, lay the yard stick across one of the shortest edges of the fabric from the top of each corner. Using the yardstick as a guide, cut one inch wide fringe in the edge of the fabric all the way across. If you cut both pieces of fabric at the same time, they will line up easier when you tie them together.
  - ❧ Do the same on the other edges of the fabric.
- ❧ After you have cut the fringe, insert the batting between the two pieces of fleece, centering it and aligning the fringe pieces on each side of the fleece. The edge of the batting should come up to where the fringe starts. If the piece of batting is too large in places, trim it.
- ❧ Take one piece of fringe from each side of the fleece and tie them together in a knot. I like to tie them twice so they don't come undone. Make sure the knot is as close to the edge of the fabric as possible. The knot should be secure, but don't pull it too tight.
- ❧ Once all of the fringe pieces are tied together, lay the blanket on a flat surface and gently stretch out each side until lays flat.
  - ❧ Your blanket is now complete.
