

FLEECE/T-SHIRT ROPE DOG TOYS

Materials Needed:

Fleece material or Clean T-Shirts

Scissors

Directions

- ❧ Take 3 strips of the fleece/fabric cut to the same width and length and stack them one on top of each other.
 - ❧ For larger toys, use strips that are about 4 inches wide and 30 inches in length.
 - ❧ For smaller toys, use strips that are about 2 inches wide and 15 inches in length.
 - ❧ Knot one end of the bunch together. Try to place the knot about 4 inches from the end. If you are using a short strip, 15 inches or less, leave about 3 inches.
 - ❧ Hold the knotted end between your knees or have a friend hold it for you.
 - ❧ Braid the strands together. Make sure the braid is nice and tight so it's harder for the dog to get his teeth through it. Leave the same amount of unbraided fleece as the first end.
- ❧ Trim the unbraided ends of the toy so they are about the same length. Leave at least 3 inches of unbraided fleece on each end.
- ❧ Tie a knot in the center if the toy is long enough. If the rope is long, tie two knots in two different spots.
